The New MA37 Moisture Analyzer Your Reliable Partner for Routine Tasks

Fast, Compact, Accurate

The MA37 is a standard next-generation lab moisture analyzer that continues the success story of the MA35. The new MA37 is even faster and easier to use than its predecessor. Yet it features the same compact footprint and delivers the same accurate results as the MA35. The BetterClean design of the MA37 ensures easy cleaning, and its status light makes it easy to track the progress of each analysis. MA37 is designed for those of you who need a simple, easy-to-use and reliable moisture analyzer for solid materials.

Faster Results

Powerful heating elements enable the analyzer to heat up faster, reducing overall analysis time. These time savings will give you a head start in taking any corrective action needed for your materials.

Convenient Progress Tracking

The MA37 status light indicates the progress of an analysis run, making it convenient for you to check the remaining time, even from a distance of 10 m or 33 ft.

Effortless Cleaning

The heating module and the sample chamber plate can be removed and cleaned in a dishwasher – this BetterClean design ensures easy, thorough cleaning of the instrument parts.

User-friendly Operating Design

The intuitive user interface featuring a new touch screen, structured user navigation and an easy-to-understand menu makes it a breeze to use the MA37.
